

European Railway Agency

An agency of the  
European Union

# Competitiveness of the European Railway System and the Enhanced Role of ERA

**Séminaire Eurodigirail  
sur la Continuité numérique de filière ferroviaire**

Saint-Denis, 22/03/2016

Dr. Josef Doppelbauer, Executive Director

- › Market opening
- › International operation
- › Interoperability
- › Safety

Gradual migration to the **optimal level of harmonisation**

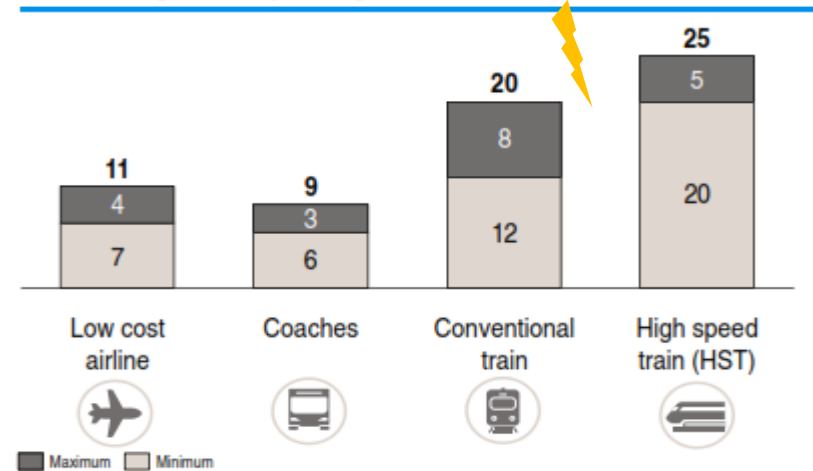

# Railways in Europe ...

Modal split of passenger transport [EU-28, % of passenger-km]

Cost level per transportation mode

Unit costs [EUR-ct /paxkm]

Dissatisfaction of passengers with punctuality [2013, % of respondents]<sup>1)</sup>

Source: Roland Berger, Eurostat

European railways have issues with cost, quality, and market share

# A View to other Transport Modes

## Aviation

Boeing 737 family 4 000 units

Airbus 320 family 3 000 units

## Hi-Speed Trains

TGV (seven types) 550 units

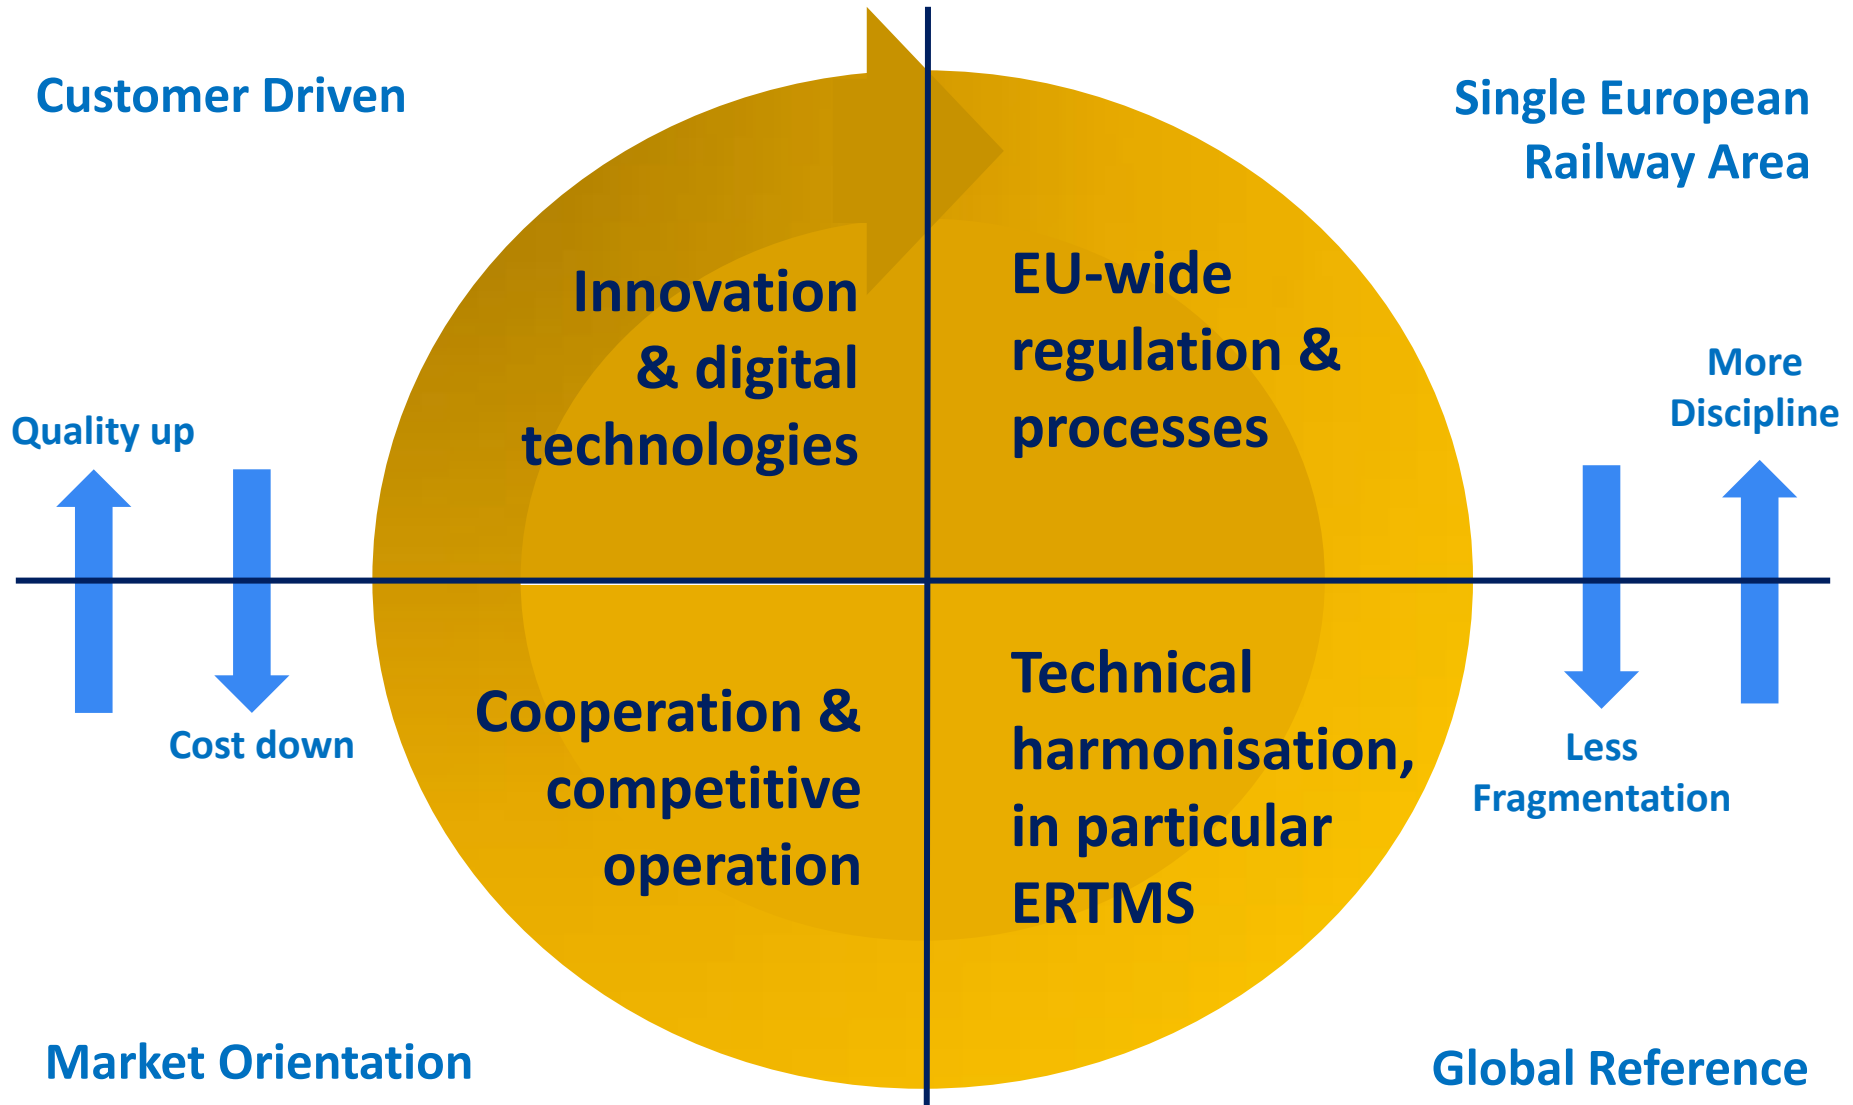

Shinkansen family approx. 600 units

# Digital Railways in Europe

- Some European railway undertakings are investing heavily in digitalization
- Many customer-focused developments are underway
- The focus is on company use and not on a wider strategic agenda

# Making the Rail System Work Better for Society

# Benefits of a Harmonized Approach

Interoperability without borders

Innovation without re-inventing the wheel

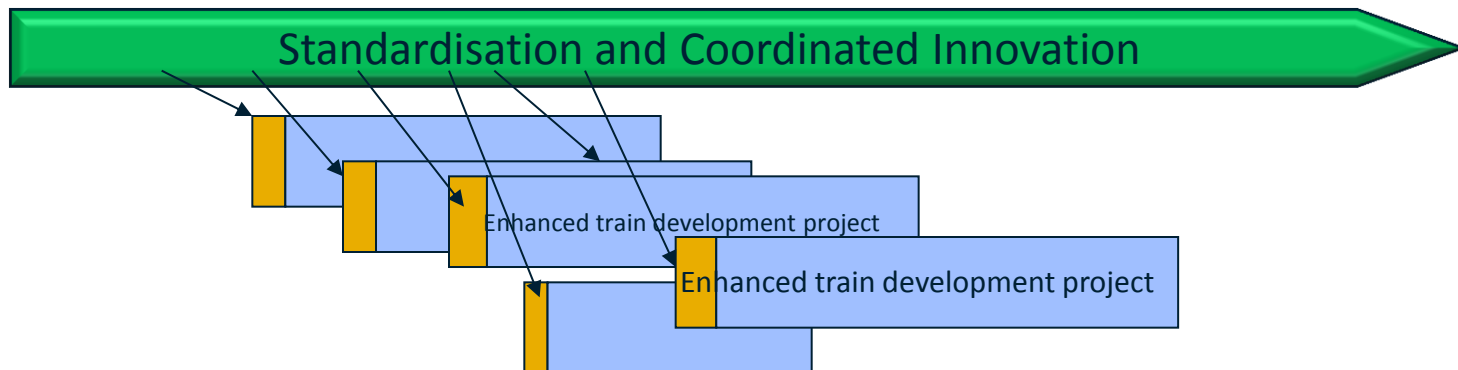

From

- Fragmented national markets
- Project specific design

To

Lower costs, better quality for customers, better margins for suppliers

## Gartner Hype Cycle (modified)

Launched in 2013 – "Completing the Single European Railway Area"

## Technical Pillar

- ERA Regulation
- Interoperability Directive
- Railway Safety Directive

Enhanced role of ERA in safety certification of RUs, vehicle authorisation, approval of ERTMS track-side technical solution – "One-Stop Shop"

Consistent approval procedures for rail interoperability and safety

**Entry into  
Force  
mid-2016**

## Political Pillar

...the domestic passenger market  
Create better structures and governance for infrastructure managers

# Vehicle Authorisation under the 4<sup>th</sup> Railway Package

Applicant submits request for VAPIM to the **One-Stop-Shop** (managed by ERA)

- Specifying the area of use of the vehicle
- Including relevant documentation

ERA/NSA issues VAPIM  
(or communicate negative decision)

- Within 4 months from reception of complete documentation
- Following detailed rules established in an Implementing Act

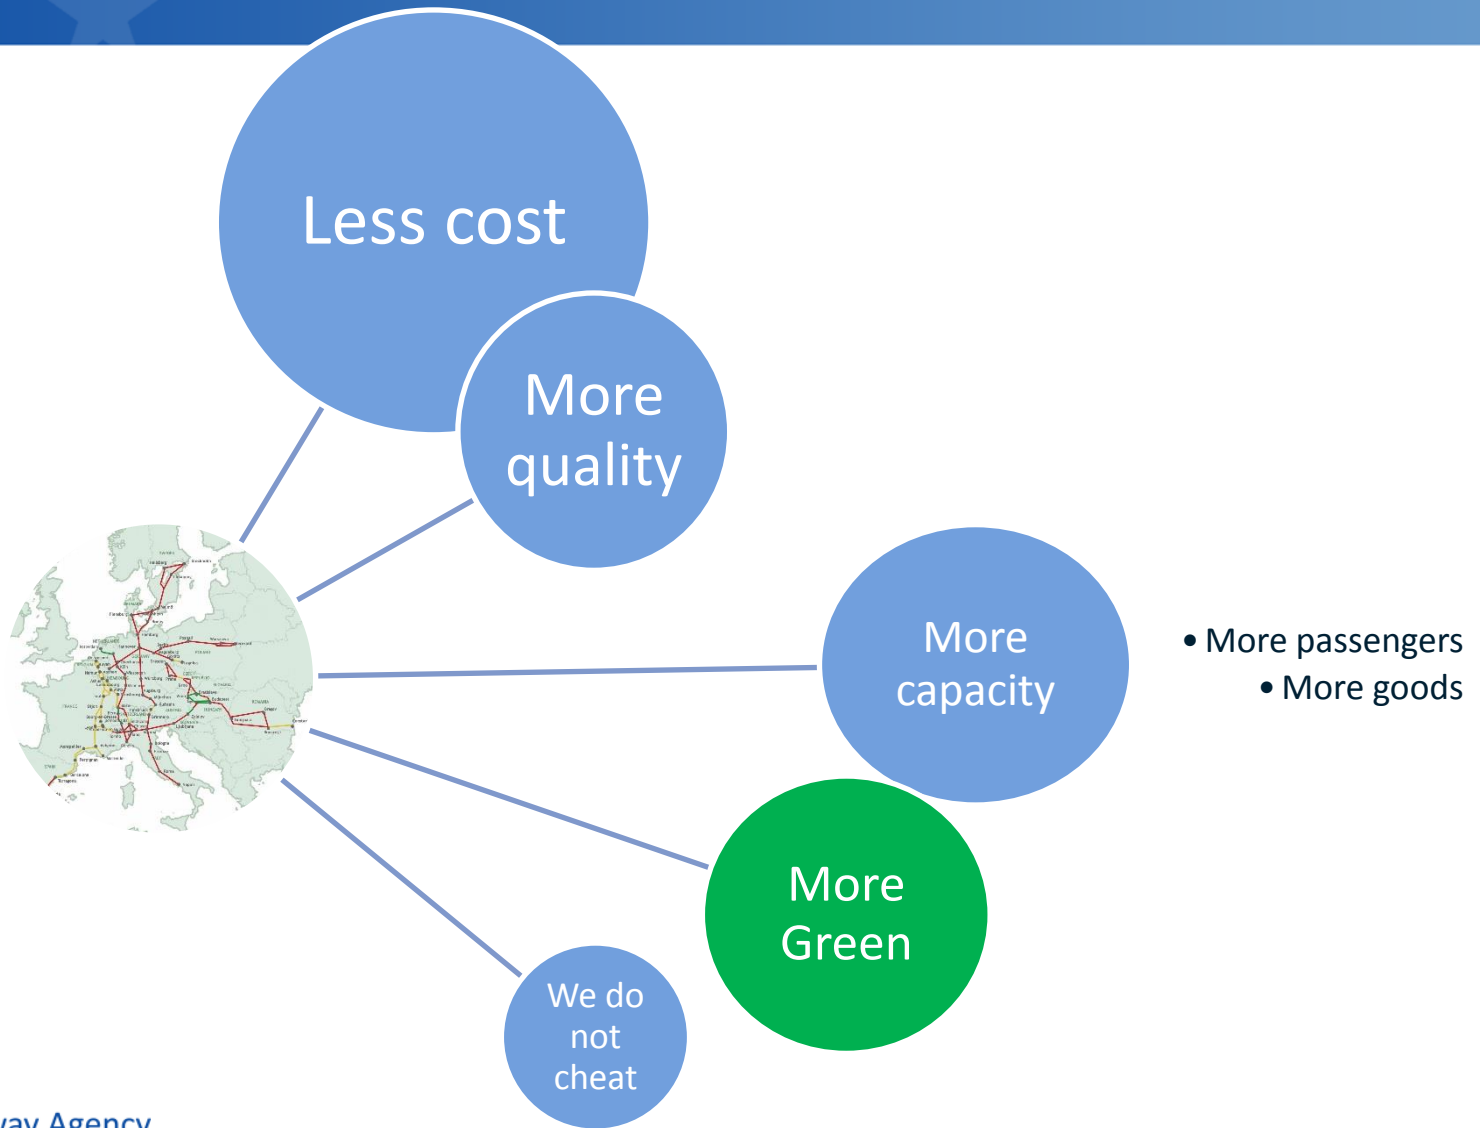

Vehicle registration  
(upon keeper's request)

Using its SMS, RU checks, including:

- Route compatibility
- Proper integration in the train composition

⇒ No need of „additional authorisations“  
if vehicle stays within area of use, conditions for use and restrictions

# A Sustainable Europe Through Rail

Making the railway system work better for society.
